

Big Trade Increase

Gutting Income Is Marled In Recent Months

The total trade of Canada during the fiscal year 1933-34 which ended March 31, aggregated \$1,010,000,000, or about \$100 million more than the fiscal year 1932-33, the department of trade and commerce announced recently. This was an increase of \$125,000,000 or about 12.5 per cent. The increase of the value of goods imported is not reflected in the statement, as it is probable that the increased export prices of gold during the past year compared with the value of goods of 1932-33. In value added, the total trade of the fiscal year 1933-34 was valued at the aggregate of \$1,160,000,000 in 1933-34.

The most gratifying increase in the trade of Canada has been very marked in recent months, according to Hon. H. B. Stevens, minister of trade and commerce, in commenting upon the statement. "It will be remembered that in April, May and June last, the first three months of the present fiscal year, trade was considerably below that of the same period of the previous year. In April it was down 29 per cent, in May 10 per cent, and in June three per cent. Exports were down 26 per cent in April but had made up the May and June deficits by the end of October until August. Exports for the month of August were 10 per cent and our imports 44 per cent, the aggregate trade for the month amounted to \$100,000,000, a very remarkable showing."

A Colonial Building

Palace Of Soviets Supposed To Express Aspirations Of Russian People

Some interesting details of the Sovieta, now projected at Moscow, have been obtained in the current issue of the Economic Review of the Soviet Union, New York. This magazine states that the new building will dwarf all existing buildings in the city.

The Palace of the Soviets will rise to a height of about 1,200 feet. It will be 1,000 feet wide and 1,200 feet high. It will be surrounded by a colonnade of Stalin, 180 feet high. The Palace of the Soviets is designed as a single structure, consisting of two main sections, one large hall seating 30,000, and a smaller hall seating 6,000. The large hall will be 100 feet high and will be covered by a dome of such dimensions that the entire structure will be able to have the feeling of being in the open air.

The drawings show the building to be of imposing proportions, and the structure is designed to be a masterpiece of architecture. The Palace of the Soviets is not seen to be a palace in the usual sense of the word, but it is a building of the future, and it is a building of the future.

More Thrilling Than Speed

Eating Too Much

Most People Would Be Healthier Eating Less

Back in the days of Queen Elizabeth in England, Francis Bacon wrote the idea that the general rule of people did considerable damage to their health by eating too much. The Chinese, who have been eating less food than the rest of the world, have been able to live longer and healthier than the rest of the world. The Chinese, who have been eating less food than the rest of the world, have been able to live longer and healthier than the rest of the world.

At the laboratory of the University of Cornell University, the diet of the Chinese, who have been eating less food than the rest of the world, have been able to live longer and healthier than the rest of the world. The Chinese, who have been eating less food than the rest of the world, have been able to live longer and healthier than the rest of the world.
